Saudi PropTech Platform

v1.2.0 | March 2026

CONFIDENTIAL

Document Information

Document Title	Mimaric Business Documentation
Version	1.2.0
Date	March 2026
Prepared By	Mimaric PropTech
Classification	Confidential

This document provides a comprehensive overview of the Mimaric platform - a Saudi-first property management solution covering the full real estate lifecycle. It is intended for stakeholders, partners, and decision-makers evaluating the platform for real estate development, property management, and facility operations in Saudi Arabia.

3 Business Workflows 12

4 User Stories & Use Cases 15

5 Unique Selling Propositions 19

6 Platform Screenshots 21

7 Basic User Guideline 27

1 Executive Summary

Platform overview and market positioning

The Problem

Saudi real estate companies manage property operations across disconnected spreadsheets, WhatsApp groups, paper forms, and multiple government portals. This fragmentation causes data loss, compliance gaps with Saudi regulations, delayed decision-making, and poor tenant and buyer experience.

- Disconnected data across spreadsheets, WhatsApp, and paper forms
- Compliance gaps across RERA, ZATCA, Ejar, Balady, and Wafi portals
- Delayed decision-making from manual data compilation
- Poor tenant and buyer experience due to fragmented communication

The Solution

Mimaric is a single Arabic-first platform that unifies every stage of the property lifecycle under one roof - from land acquisition and project planning to sales, leasing, maintenance, and financial reporting.

- Eliminate Spreadsheet Chaos - Centralized data for land, projects, units, customers, contracts, and maintenance
- Saudi Regulatory Compliance Built-In - RERA, ZATCA, Ejar, Balady, and Wafi integrated into workflows
- Data Protection by Design - AES-256-GCM encryption, PDPL/NCA compliance, full audit trails
- Bilingual RTL-First - Arabic/English interface with Hijri/Gregorian dates and SAR formatting
- Decision Intelligence - Real-time dashboards with pipeline analytics and cost trends
- Multi-Tenant Collaboration - 13 roles with 30+ granular permissions and org-scoped data isolation

- Real Estate Developers مطورون عقاريون
- Property Management Companies شركات إدارة الأملاك
- Facility Management Firms شركات إدارة المرافق
- Individual Property Owners ملاك عقارات

Vision 2030 Alignment

Mimaric directly supports Saudi Arabia's Vision 2030 digital transformation agenda by providing e-government integration readiness with Ejar, Balady, ZATCA, and Wafi systems. The platform enables paperless property management workflows, data-driven decision making, and regulatory compliance automation - reducing the dependency on manual processes and paper-based government interactions.

18 Modules	13 Roles	58 FAQs	6 Gov APIs

2 Property Development

Land Acquisition الأراضي

End-to-end pipeline from identification through due diligence to acquisition, with interactive map picker, suitability scoring, and conversion to project.

Planning OS التخطيط

GIS-integrated subdivision planning with multiple scenarios, compliance checking against Saudi regulations, feasibility analysis, and 'Promote to Project' workflow.

Projects المشاريع

Development project management with 14-stage lifecycle stepper across 5 phases, P&L financials tab, building management, and Balady document uploads.

Unit Matrix الوحدات

Track units across buildings with area, price, type, availability. Unit detail panel shows financial summary (P&L) and linked contract information.

Site Logs سجلات الموقع

Construction progress tracking with daily logs, inspections, snags, safety reports, and weather entries with severity levels.

2 Sales & CRM

Customer CRM العملاء

Unified customer database with Kanban pipeline (New, Interested, Qualified, Viewing, Reserved), encrypted PII, and list/card views.

Reservations الحجوزات

Temporary unit holds with 4-step wizard supporting both traditional units and off-plan inventory items, with expiry management.

Contracts العقود

Full contract lifecycle (Draft, Sent, Signed, Cancel/Void) with Saudi Ejar lease compliance and Wafi off-plan sale compliance. Auto-generated contract numbers and installment schedules.

2 Leasing & Finance

Rentals الإيجارات

Full tenancy lifecycle with Ejar-compliant lease creation, auto-generated installment schedules, rent collection tracking with overdue alerts.

Finance المالية

Payment tracking, installment schedules, ZATCA-compliant VAT calculation (15%), revenue KPIs, project-level P&L aggregation.

Billing الاشتراك والفوترة

SaaS subscription management with 3-tier plans (Lite/Professional/Enterprise), monthly/annual billing, coupon codes, invoice history with VAT.

2 Operations

Maintenance CMMS الصيانة

Work order management with 6-stage workflow (Open to Closed), SLA tracking, technician assignment, and cost tracking.

Preventive Maintenance الصيانة الوقائية

Frequency-based scheduling (daily to annual), auto work-order generation, 10 maintenance categories.

Reports التقارير

Excel/PDF export for 10 report types: occupancy, financial, maintenance, leases, customers, development pipeline, approval status, pricing analysis.

2 Platform & Administration

Dashboard نظرة عامة

Real-time KPI cards with occupancy rates, land pipeline, project status distribution, maintenance cost trends, and revenue analytics.

Help Center المساعدة

58 searchable FAQs across 8 categories, 25 step-by-step guides (bilingual), support ticket system, permission request workflow.

Settings الإعدادات

Organization profile (MOC-aligned), team management with email invitations, security settings, and audit log viewer.

Platform Admin إدارة المنصة

Admin hub for subscription plans, monitoring all subscriptions, creating coupons, viewing platform-wide invoices and revenue.

Onboarding التسجيل

4-step post-registration wizard: org path choice (join/create), business identity, contact info, team invitations.

2 v1.2.0 Highlights

Latest enhancements and new features

What's New in v1.2.0

- Ejar-Compliant Lease Contracts - Payment frequency, 5% security deposit cap, auto-renewal, maintenance responsibility, 60-day notice period
- Wafi-Compliant Sale Contracts - Delivery date, Wafi license reference, automatic escrow deposits on signing
- Contract Lifecycle State Machine - Draft, Sent, Signed with Cancel/Void transitions and automatic side-effects
- Auto-Generated Contract Numbers - Unique numbers per type (SALE-2026-XXXX / LEASE-2026-XXXX)
- Progressive vs Destructive RBAC - Separate permissions for create/send/sign vs cancel/void/delete
- Unit-Contract Bridge - Linked contract info and financial summary (P&L) in unit detail panel
- Help Center Expansion - 58 FAQs (+14 new) and 25 guides (+4 new) covering all contract workflows

3 Business Workflows

End-to-end process flows

Land to Launch الأرض إلى الإطلاق

Land Identified → Due Diligence → Acquired → Planning OS → Subdivision → Authority Approval → Infra Build → Inventory → Pricing → Launch

Sale to Escrow (Wafi) البيع إلى الضمان

Lead Generated → Qualified → Viewing → Reserved → Contract Draft → Contract Sent → Contract Signed → Escrow Deposit → Unit Sold

Business Workflows (continued)

Lease to Collection (Ejar) الإيجار إلى التحصيل

Tenant Inquiry → Viewing → Lease Created → Contract Signed → Installments Generated → Monthly Collection → Overdue Tracking → Renewal

Off-Plan to Wave Sales على الخارطة إلى الإطلاق

Project Approved → Inventory Structured → Pricing Rules → Wave Created → Readiness Check → Wave Launched → Reservations → Conversions

Business Workflows (continued)

Maintenance to Resolution الصيانة إلى الحل

4 User Stories & Use Cases

13 roles organized by business tier

Management Tier

System Admin

مدير النظام

Full platform + all org access

"As a System Admin, I can manage all subscription plans and monitor all organizations across the platform."

PII Export Finance Audit

System Support

دعم النظام

Platform operations and ticket management

"As System Support, I can manage support tickets, assign them to staff, and monitor resolution times."

PII Export Finance Audit

Company Admin

مدير الشركة

Full organization control, no platform access

"As a Company Admin, I can manage my team, approve contracts, control permissions, and view audit logs."

PII Export Finance Audit

Sales & Leasing Tier

Sales Manager

مدير المبيعات

CRM oversight, contracts, customer PII

"As a Sales Manager, I can view customer PII, create Ejar/Wafi contracts, manage reservations, and export sales reports."

PII | Export | Contracts Write

Sales Agent

وكيل مبيعات

Sales execution, no PII or export

"As a Sales Agent, I can manage leads, create reservations, and draft contracts, but I cannot access customer PII or export data."

Contracts Write | No PII | No Export

Property Manager

مدير العقارات

Rentals, maintenance, tenant management

"As a Property Manager, I can manage tenancies, create maintenance requests, and view lease contracts for my properties."

Contracts Read | Leases

Specialized Tier

Project Manager

مدير المشاريع

Projects, units, site logs

"As a Project Manager, I can manage projects through all 14 lifecycle stages, create buildings and units, and track site logs."

Contracts Read | Planning

Finance Officer

مسؤول مالي

Payments, reporting, financial data

"As a Finance Officer, I can track payments, manage installments, calculate VAT, generate financial reports, and monitor escrow accounts."

Finance | Escrow

Technician

فني صيانة

Maintenance work orders only

"As a Technician, I can view assigned work orders, update status, log labor hours, and record maintenance costs."

Maintenance

Eng. Consultant

مستشار هندسي

Wafi milestone certification

"As an Engineering Consultant, I can certify project milestones and upload evidence for Wafi compliance."

Wafi

End User Tier

Buyer

مشتري

Purchase tracking, documents

"As a Buyer, I can view my purchased units, track contract status, and submit maintenance requests."

Contracts Read

Tenant

مستأجر

Lease viewing, maintenance requests

"As a Tenant, I can view my lease contract details, payment schedule, and submit maintenance requests."

Contracts Read | Ejar

User

مستخدم

Basic access, profile management

"As a User, I can view the dashboard, access the help center, and manage my profile."

Dashboard

5 Unique Selling Propositions

What sets Mimaric apart

1 Saudi-First Compliance

- RERA licensing, ZATCA VAT, Ejar rental, Balady permits, Wafi escrow
- Integrated into workflows, not afterthoughts
- No local consultant needed for regulatory setup

2 Full Lifecycle Coverage

- Land acquisition through post-handover in one platform
- Eliminates the need for 5-7 separate software tools
- Seamless data flow across all property stages

3 Arabic-First Bilingual

- RTL-first UI with IBM Plex Arabic typography
- Hijri/Gregorian dual dates, SAR currency formatting
- Not a translated English product

4 Data Protection by Design

- AES-256-GCM PII encryption, 30+ granular permissions
- PDPL/NCA compliance built into architecture
- Full audit trails per PDPL Article 32

5 Vision 2030 Aligned

- E-government integration (Ejar, Balady, ZATCA, Wafi)
- Paperless workflows and data-driven decisions
- Supports Saudi digital transformation agenda

6 SaaS Multi-Tenant

- 13 user roles with 30+ granular permissions
- Organization-scoped data isolation, CR-based discovery
- 3-tier subscription plans, ready for scale

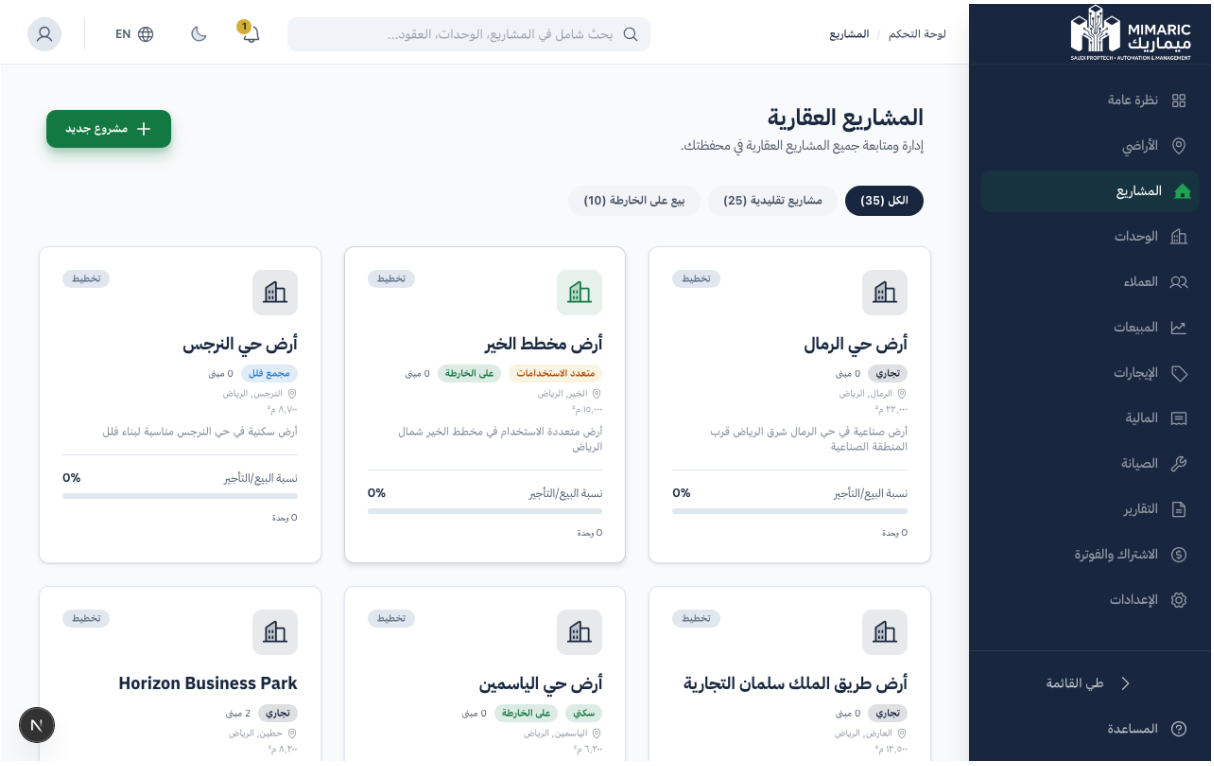
Dashboard Overview

Real-time KPI dashboard showing occupancy rates, revenue analytics, project status distribution, maintenance cost trends, and land pipeline visualization.

Key Capabilities

- 12+ KPI cards with real-time data
- Interactive charts and visualizations
- Date range filtering
- Role-based data visibility

Project Management

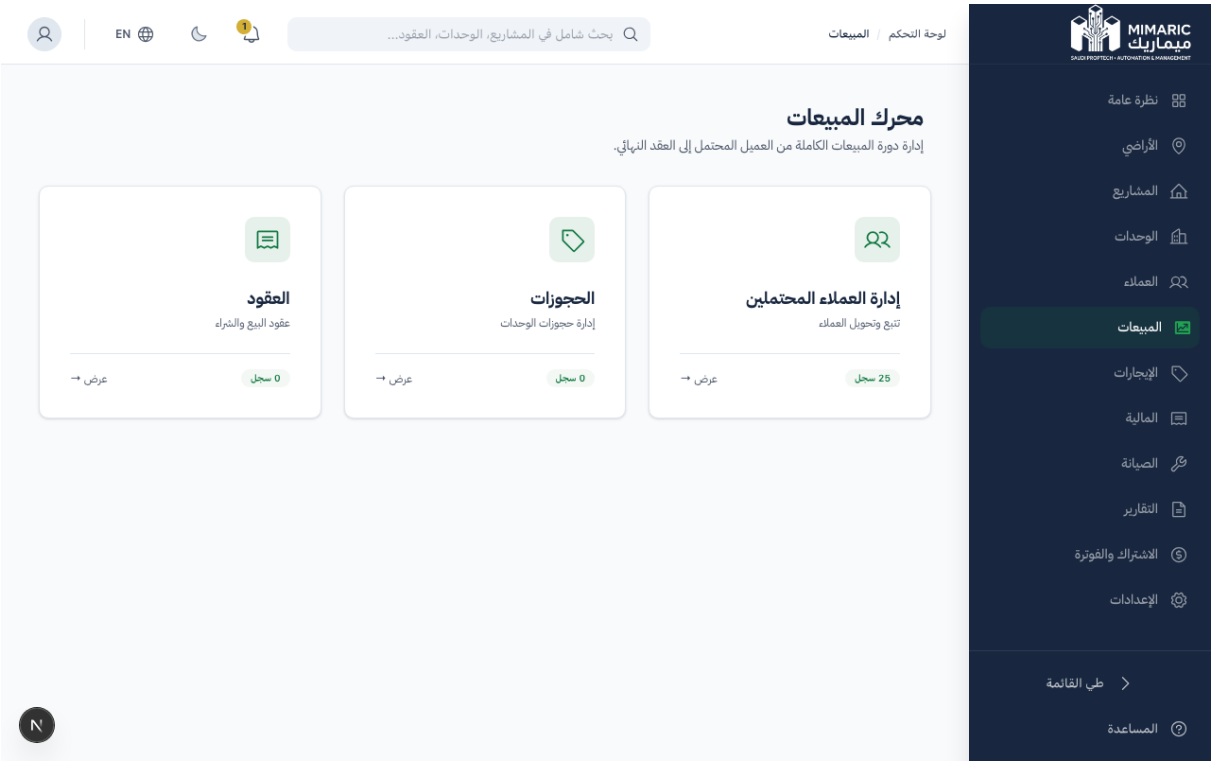


Project portfolio view with card-grid layout showing project types, progress status, and key metrics for each development.

Key Capabilities

- 14-stage lifecycle stepper
- P&L; financials tab
- Building/unit management
- Document vault with versioning

Sales & Contracts

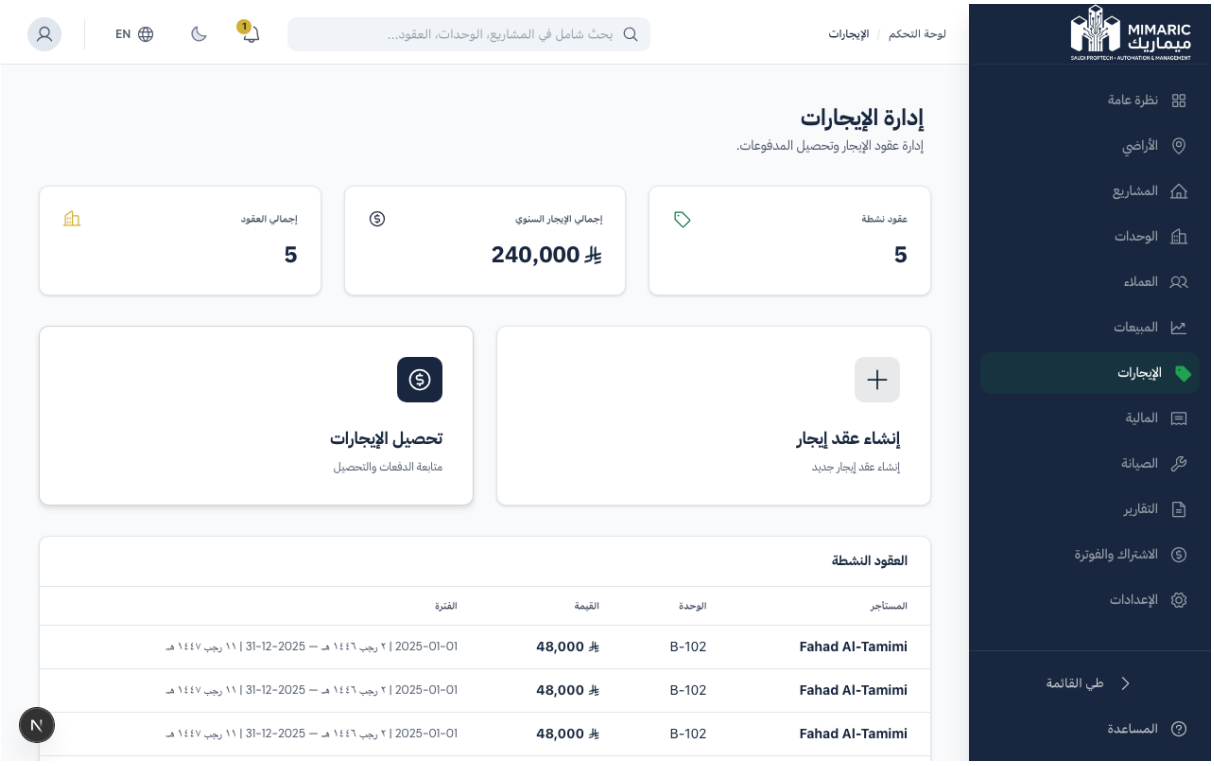


Sales engine hub with customer CRM pipeline, reservation management, and Ejar/Wafi compliant contract lifecycle tracking.

Key Capabilities

- Kanban + List views
- Contract state machine (Draft/Sent/Signed)
- 4-step reservation wizard
- PII encryption for customer data

Rental Management

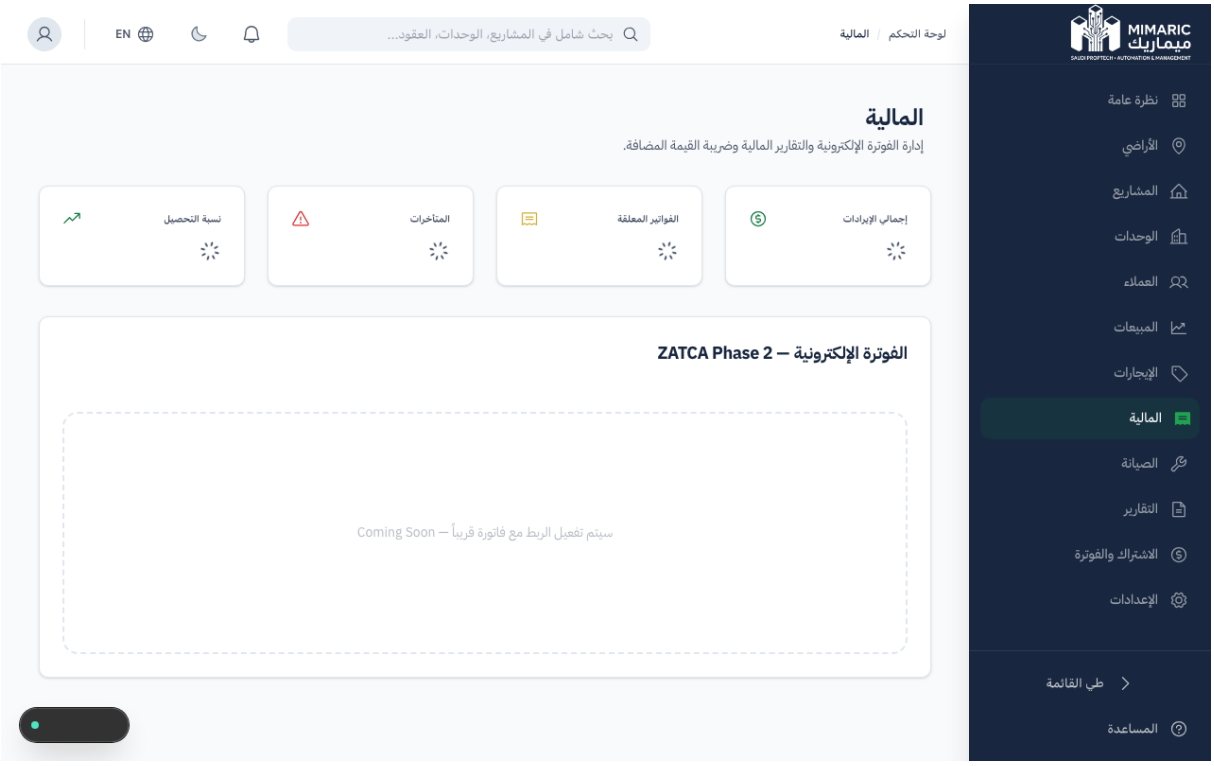


Rental management dashboard with Ejar-compliant lease creation, installment schedule tracking, and rent collection monitoring.

Key Capabilities

- Auto installment generation by frequency
- Payment frequency options (monthly to annual)
- Overdue tracking and alerts
- Tenant management

Financial Overview

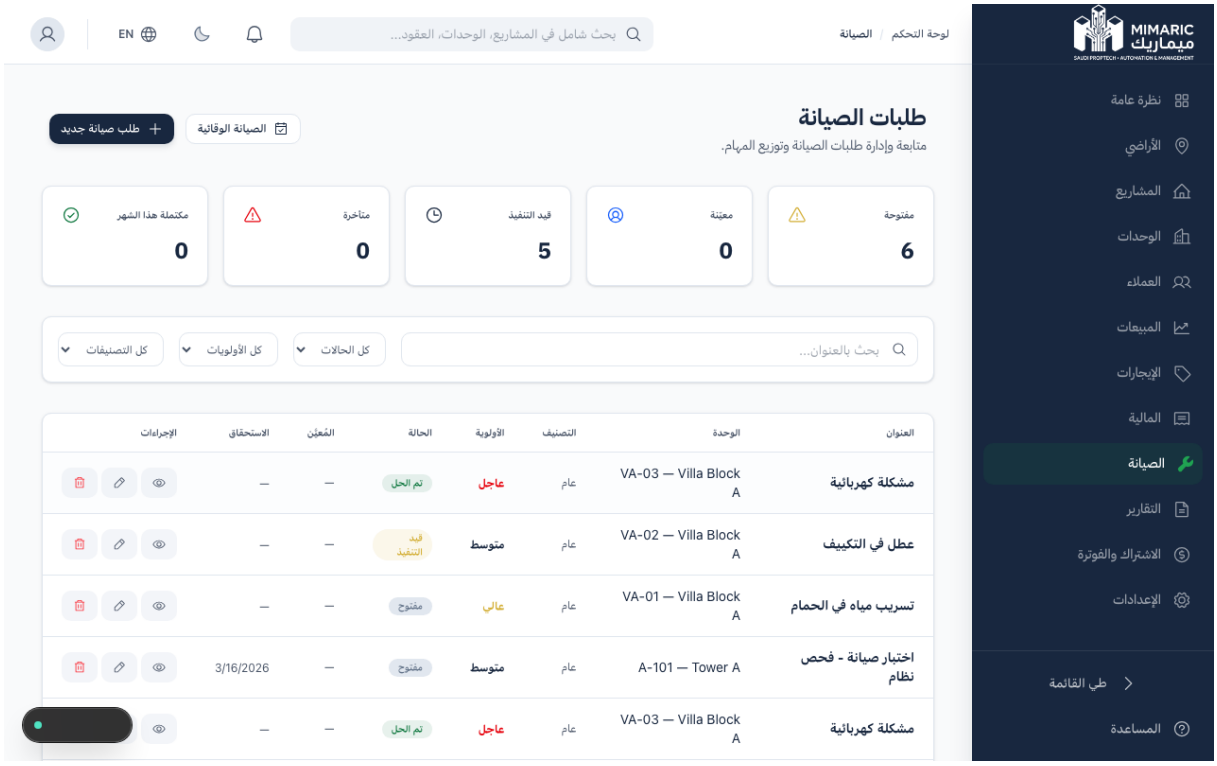


Financial overview with revenue KPIs, payment tracking, ZATCA-compliant VAT calculation, and installment schedule management.

Key Capabilities

- VAT 15% calculation (ZATCA)
- Payment status tracking
- Invoice generation
- Excel/PDF export

Maintenance CMMS



CMMS work order management with SLA-based priority tracking, technician assignment, and preventive maintenance scheduling.

Key Capabilities

- 6-stage work order workflow
- SLA timers (2h to 168h)
- Preventive scheduling
- Cost and labor tracking

7 Basic User Guideline

Getting started with Mimaric

Getting Started

1 Step 1: Register

Choose Individual or Company account. Enter your name, email, and password (minimum 10 characters, NIST SP 800-63B compliant). Individual users can search for existing organizations by Commercial Registration number.

2 Step 2: Onboard

Complete the 4-step setup wizard: (1) Choose org path - join an existing company or continue independently, (2) Enter business identity - company name, CR number, VAT number, entity type, (3) Add contact details - mobile, city, region, (4) Invite team members with role assignment.

3 Step 3: Navigate

Access the main dashboard. Your sidebar navigation shows only the modules matching your role permissions. Company Admins see all modules; Technicians see only Dashboard and Maintenance. Language toggle (AR/EN) and theme toggle (light/dark) are in the top bar.

Key Workflows Quick Reference

Task	Where to Go	Key Steps
Add a property	Projects > New Project	Enter name, type, location > Add buildings > Add units
Create a lease	Sales > Contracts > New (Lease)	Select tenant + unit > Set Ejar terms > Save > Send > Sign
Record a sale	Sales > Contracts > New (Sale)	Select buyer + unit > Set Wafi terms > Save > Send > Sign
File maintenance	Maintenance > New Request	Select unit > Choose category + priority > Describe > Submit
Generate report	Reports > Select type	Choose report type > Set date range > Click Excel or PDF

Role-Based Navigation Guide

What you see in the sidebar depends on your assigned role.

Role	Sidebar Modules	Primary Actions
Company Admin	All modules	Team management, approvals, audit review
Sales Manager	Dashboard, Customers, Sales, Reports	Lead management, contract creation, reporting
Property Manager	Dashboard, Units, Rentals, Maintenance	Lease management, work orders, tenant support
Finance Officer	Dashboard, Finance, Reports, Billing	Payment tracking, VAT, financial reports
Technician	Dashboard, Maintenance	Work order updates, cost logging

Thank You

شكرا لكم

Mimaric PropTech
Saudi Arabia

Built for the Saudi Property Market

Compliant with RERA, ZATCA, Ejar, Balady, PDPL, and NCA standards
